Clean Air Means Healthier Air

Concerned about the air you breathe?

Considering that you spend about 90% of your time indoors, breathing in 18,000 liters of air each day, which may be 20-70 times more polluted than outdoor air you should be concerned!

Some of these airborne contaminants are uninvited like pollen, mold, fungi, bacteria, viruses, dust and mites. While others are self-contributed like tobacco, wood or cooking smoke, pet dander, insecticides, toxins emitted from personal care products or household cleaners.

These contaminants adversely affect indoor air quality, which in turn affect your health and comfort. Whether the effects are mild or severe, short or long ranging, they can cause symptoms like itchy, watery eyes, sore throat, sneezing, runny nose, headache, fatigue, tightness of chest, shortness of breath and even epidemics of colds or flu.

Even if you're not immediately affected, the smallest pollutants are inhaled and retained deep in the lungs, which may result in respiratory and other health problems after years of repeated exposure.

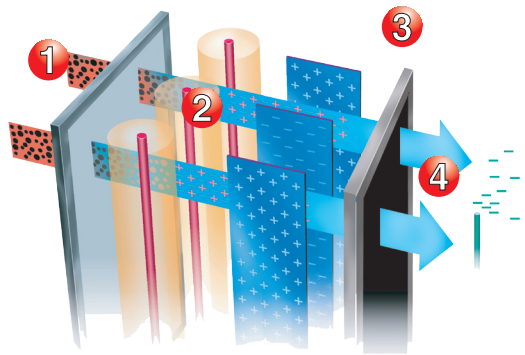

How can Five Seasons Air Cleaners help?

- Removes irritating airborne allergens. A must for allergy, asthma and respiratory sufferers.
- Helps smokers and non-smokers live and work together in harmony.
- Helps reduce or eliminate offensive tobacco, cooking or pet odours.
- Helps reduce housekeeping time and redecorating costs by removing the black, greasy and staining airborne particles.
- Improves indoor air quality for a healthier, more comfortable environment, year round.

Powerful 4-Stage Filtration System

- 1 Washable Prefilter** captures large particles of dirt, lint and hair.
- 2 Lifetime Electronic Filter** charges pollutants by fine wires and attracts them to collecting plates, where they adhere like a magnet until washed away. Removes airborne contaminants down to 0.01 micron (1/2,540,000 of an inch).
- 3 Activated Carbon Odour & Gas (VOC) Filter** helps remove Volatile Organic Compounds emitted from sources like carpets, cabinets, glues, household cleaners, paints, varnishes, solvents, personal care products, tobacco and cooking smoke, and more.
- 4 Negative Ions** are emitted into the clean air stream. Healthy Negative Ions revitalize the air, just like after a rainfall, near a waterfall or near a spring. Studies have shown that Negative Ions have a beneficial effect on human biochemistry, both physically and mentally.

Why choose a Five Seasons Electronic Air Cleaner, Negative Ionizer & VOC Filter?

- Environmentally-Friendly, Lifetime Electronic Filter never needs replacing - simply washes clean. Savings over first 2 years could pay for unit.
- Electronic Filter holds dirt particles like a magnet, which won't dislodge until washed away.
- Electronic Filter has more effective filtration area than most disposable filters or other electronic air cleaners on the market.
- User-friendly. There are no complicated controls. It's easy to access the filters and easy to maintain.
- Unique air intake / exhaust design creates circular air flow patterns that never short cycle or blow directly on room occupants.
- Five Seasons Air Cleaners all come with the added feature of Negative Ions.
