

## Declaration

### 24-Months Shelf Life

Based on the raw material stability data, research & development experience and data collected by SaNOTize during the nitric oxide releasing solution development process, we declare that the Enovid is stable for a period of 24 months.

An ongoing stability plan is in place for three commercial batches for up to 36 months. This includes the following stability parameters:

Long term :  $25^{\circ}\text{C}\pm 2^{\circ}\text{C}$  /  $60\% \text{ RH}\pm 5\%$

Long term :  $30^{\circ}\text{C}\pm 2^{\circ}\text{C}$  /  $75\% \text{ RH}\pm 5\%$

Accelerated :  $40^{\circ}\text{C}\pm 2^{\circ}\text{C}$  /  $75\% \text{ RH} \pm 5\%$

The distributor who holds the marketing authorization, is contractually obliged to comply with the GDP which includes a commitment to ensure traceability and recall capabilities.
